

The training programme covers a full curriculum consisting of both mandatory units and further optional units thereby ensuring the required learning hours are met as well as offering a full, well rounded, and comprehensive content. These Units are taught at seminars held throughout the year at the training centre farms, according to set criteria and outcomes and assessment plans/tasks are set to ensure deeper understanding of each unit. Topics include : Plant & Animal Phenomenology; Farm Fertility; Soil Cultivation; Compost; BD Preps; Enterprise Management; Habitat Management; Nature and Human Life; Seed production; Animal Husbandry; Bee Husbandry; and Agricultural Astronomy (*request a Prospectus for the complete list from [training@bdaasa.org.za](mailto:training@bdaasa.org.za)*).

**BDAASA aligns itself to Demeter standards (<http://www.demeter.net>)**

**Our programme is independently assessed and quality assured.**
